

Review and compare software products

Teachers and administrators want to know how our products compare to others. JFY only partners with products after they have been thoroughly vetted by our Blended Learning Specialists. Even though the service we provide is the key difference, clients want to see how our products compare to other options. This comparison of two products provides a clear contrast of the different features and pedagogical approaches.

Teachers can have students work independently on subjects.

Ellen can be working on Algebra.

5. Solve: $2(5x + 3) = -3(4x - 3) + 2x$

✓ $10x + 6 = -12x + 9 + 2x$

...

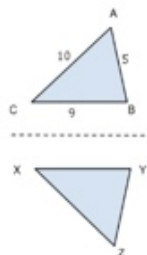

$10x + 6 = -12x + 9 + 2x$

Jamison can be working on Geometry.

10. $\triangle ABC$ is reflected along the dotted line and its image $\triangle XYZ$ is produced.

a.

Find the length of each side:
 $XY =$ cm $YZ =$ cm $XZ =$ cm

IXL is aligned to some of the most popular test books used in schools. Most of the textbooks are for grades K – 6. Only 2 books are for High School use.
